

Spacek Wall Sconce

MATTHEW FAIRBANK
— DESIGN —

Description The Spacek Wall Sconce features a forged metal body that supports a linear glass lens. Light filters through bronze, smoke, or starphire glass. The fixture body is available in a variety of finishes which can be coordinated to an array of architectural environments. The narrow body is ADA compliant, and houses environmentally friendly LED bulbs for minimal power consumption.

Year of Design 2013

Material Solid forged brass body and tempered glass lens.
